

Guest Check Out and Check In during Covid 19

- For a decade we clean, disinfect high touch objects, restock and reset our holiday homes. After check out we let our vacation homes sit for 8 hours.
- Then we prepare the property for cleaners by running UV C High Capacity O3 Oxygenator's in each room. Sixteen hours later, we commence cleaning followed by owner disinfection.
- Twenty-four hours prior to Guest arrival, we run our UV Germicidal Light Sterilizer in each room. UV wavelengths irradiate microbes to destroy both their DNA and RNA so that bacteria lose its ability to survive.
- We then place the keys for the guest in a UV C Cell phone box followed by sealing the property until the quest check in. In short, we've done everything we can to breathe new life into our storied 1923 Bungalow and Cottage.

Two behavioral changes—frequent hand-washing and wearing masks—is enough to drastically reduce the possibility of catching COVID-19. It certainly doesn't eliminate the risks, but it takes it down from very high, to quite low.

New Amenities

- Hand Sanitizing Gel, and disinfectant wipes for Guest use. Trying to prepare for a time when we enable guests to consider vacations in an informed, safe and socially responsible way. Presently we are hosting 28 night stays only.

Disinfection

Our disinfection includes all door handles and cabinet knobs, light switches, light and fan pull chains, remotes, charging station, bathroom and kitchen faucets, refrigerator & coffee/tea pot handles, oven, microwave, stove top knobs, Iron, Hairdryer, washing machine and dryer handles, toilet and flat surfaces with every change in the hotel cleaning.

All Housekeepers and Repairmen are issued at the Properties expense, Nitrile Exam Gloves and 3 layer face masks whenever they enter our properties to keep everyone safe.

AVOID running into other people that you have no idea what their infectious status is.

You can prepare your own food, which is **both safer and cost-saving.**

When booking any **type of lodging, consider** how many people you'll be surrounded by,

BOOKING BUFFER No one would have stayed in the accommodation in the last 56 hours.

As a general rule because the main risk in coronavirus transmission is directly from person to person. You are more likely to have person-to-person encounters in hotels compared with private Vacation Rental.
